App Store — Feature List

Everything the App Store does, at a glance.

Browsing

Feature	Detail
App cards	Name, price and a full description for every app available to your store.
Search	Type any part of a name; the list narrows as you type.
Already Purchased	Apps you own are marked, and offer a route into their settings instead of a purchase.
Curated per store	You see the range chosen for your store, not a generic catalogue.
Hidden when empty	If nothing has been made available, the menu does not appear at all.

Adding

Feature	Detail
One-click add	Add this app , then a confirmation that names what you are adding.
Progress feedback	The card shows a working state while the app is set up, and disables itself against double-clicks.
Straight to settings	On success, Open it links directly into the new app's configuration.
Multi-part apps	Also sets up lists everything that comes with the app, before you commit.
Correct install order	Computed from what each piece requires, so it cannot drift out of date.
Prerequisite checking	Anything the app depends on is verified before work begins.
Honest failure	A partial result is reported as a failure, never as success.

Managing what you own

Feature	Detail
Switch off	Takes the app out of your store, reversibly.
Switch on	Brings it back, with its data intact.
Data preserved	Switching off keeps balances, agreements, jobs and stock figures.

Control and accountability

Feature	Detail
Administrator only	Adding and switching apps is limited to administrator sign-ins.

Fixed access scope	What an app opens up is set in reviewed platform code, not in an editable field.
Full history	Every add, switch-on and switch-off recorded with app, outcome, time and person.
Named actor	The record identifies the real administrator who acted.
One at a time	Simultaneous clicks queue instead of colliding.
No storefront impact	Your shop keeps trading while an app installs.

Apps available

App	Adds
Gift Cards	Sell and redeem gift cards with tracked balances.
Layaway	Deposits and staged payment against reserved goods.
Inventory	Stock levels, and control of what sells or ships from where.
Service & Repair	Workshop intake, job tracking, labour and parts billing.
Product Reviews	Shopper reviews and ratings on product pages.
Point of Sale	In-person selling, till screen and card readers.
Commission	Sales staff earnings by rate or channel.

Your own list depends on what has been made available for your store.
