

FacebookEmbed Widget - Release Notes

Release date: May 3, 2026 Widget: `Facebook Embed`

Summary

The FacebookEmbed widget places public Facebook posts or videos into CMS pages with responsive sizing, SDK controls, and fallback behavior.

Main outcome: editors can embed Facebook content by URL or embed code while controlling display and video options.

Features

- Supports public Facebook post, video, and fb.watch URLs.
- Can extract valid source URLs from pasted embed code.
- Includes post text, lazy load, fullscreen, autoplay, captions, width, theme, and SDK settings.
- Provides fallback text, custom CSS class, and accessibility label controls.

Documentation Pack

- `FacebookEmbed_Widget_Feature_Technical_Documentation.html`
- `FacebookEmbed_Widget_Feature_Release_Notes.html`
- `FacebookEmbed_Widget_Marketing_Blog_Post.html`
