InstagramEmbed Widget - Release Notes

Release date: May 3, 2026 Widget: `Instagram Embed`

Summary

The InstagramEmbed widget embeds public Instagram posts, Reels, and TV posts with responsive width controls and caption options.

Main outcome: editors can add Instagram content from a permalink or embed code while controlling layout and fallback behavior.

Features

- Supports Instagram post, Reel, and TV URLs.
- Accepts pasted Instagram embed code.
- Includes caption, alignment, width, min/max width, theme, script-loading, fallback, custom class, and accessibility controls.
- Validates source URL/embed code before saving.

Documentation Pack

- `InstagramEmbed_Widget_Feature_Technical_Documentation.html`
- `InstagramEmbed_Widget_Feature_Release_Notes.html`
- `InstagramEmbed_Widget_Marketing_Blog_Post.html`
