

# SocialShare Widget - Release Notes

Release date: May 3, 2026 Module: `Cms` Widget: `Social Share`

## Summary

The SocialShare widget provides configurable sharing controls for CMS pages with selectable networks, flexible display modes, brand styling, custom spacing, and share metadata overrides.

Main outcome: editors can add polished share buttons or logo-only share controls without custom code.

## Feature Coverage

- Supports Facebook, X, LinkedIn, Pinterest, WhatsApp, Email, Copy Link, and Native Share.
- Includes button, logo plus label, and logos-only display modes.
- Provides button size, logo size, icon size, corner style, spacing, alignment, and brand color controls.
- Allows current-page share metadata to be overridden per widget instance.
- Includes copy-link success messaging and optional popup behavior.

## Documentation Pack

- `SocialShare\_Widget\_Feature\_Technical\_Documentation.html`
- `SocialShare\_Widget\_Feature\_Release\_Notes.html`
- `SocialShare\_Widget\_Marketing\_Blog\_Post.html`

## Usage Notes

- Use logos-only mode when space is tight or a cleaner icon row is needed.
- Use share metadata overrides when sharing a campaign URL instead of the current page URL.
- Use custom CSS class for page-level styling extensions.
