

TikTokEmbed Widget - Release Notes

Release date: May 3, 2026 Widget: `TikTok Embed`

Summary

The TikTokEmbed widget embeds public TikTok videos or profiles with responsive sizing, card/player rendering, and player-control options.

Main outcome: editors can add TikTok content to CMS pages with useful controls and safe URL normalization.

Features

- Supports TikTok video, profile, and short-link paths.
- Extracts valid TikTok URLs from embed code.
- Supports card rendering and video player rendering.
- Includes sizing, alignment, theme, playback, control, caption, and fallback options.

Documentation Pack
