

XEmbed Widget - Release Notes

Release date: May 3, 2026 Widget: `X Embed`

Summary

The XEmbed widget embeds public X posts and timelines with responsive display controls and safer URL normalization.

Main outcome: editors can add X content using a URL or embed code while keeping display and privacy options configurable.

Features

- Supports X and legacy Twitter URLs.
- Supports post and timeline embeds.
- Includes theme, width, height, language, and timeline limit controls.
- Provides hide-media, hide-thread, header/footer/border, transparent, scrollbar, replies, and DNT options.
- Includes fallback text, custom class, accessibility label, and script-loading control.

Documentation Pack

- `XEmbed_Widget_Feature_Technical_Documentation.html`
- `XEmbed_Widget_Feature_Release_Notes.html`
- `XEmbed_Widget_Marketing_Blog_Post.html`
